Experience

During 2010 I participated in the Family Planning Association's training for answering the Help Line 1455 "Youth for Youth". Since then I have been a volunteer for CFPA. In August of 2013 I have participated in the "Homo-No-Phobia" Training Program, which was organised by YEÜ Cyprus and aimed to prevent and target homophobia in education settings. In May 2015 I participated in the training of trainers of the CFPA, for organizing and applying activities and training programs for the promotion of the sexual and reproductive health in youth, families and teachers. During the same period of time I have participated in the training program "Shield Homophobia in Education" for preventing and intervening in cases of homophobia that occur in the school settings. Moreover, during the past three years I have been working at the "C' Technical School" of Limassol as a group facilitator for the application of the program "Teenagers' Discussions" in groups of teenagers, aiming to promote their self-esteem and self-efficacy.
