

Bullying

We believe that bullying, is a social problem and as such should be treated. Bullying is the result both of the relations within society as well as the way in which the education system functions.

Policy positions:

- Significant changes in the educational system, its structure and its content, which will provide a definitive solution not only to the elimination of bullying, but also to all forms of violence and delinquent behavior.
- Support for victims of bullying.
- Take preventive and educational measures instead of disciplinary measures against intimidators.
